

The law should be strengthened not weakened. It should also include fax "telemarketing". Telemarketers have caused me to lose business by crowding out other phone calls. Sometimes they are abusive and they are always persistent. Telemarketers have called as early as 7:30 in the morning and I have now way to track them down and file a complaint. I'm too busy trying to make a living. I depend on my elected officials to protect me against such "telephone extortion" and I expect you to do your job!
